Oregon Aero® SoftSeal® Ear Cushions

Installation Instructions For Headsets with Ear Cup Flange

1. Remove old ear seals from the ear cups. Make sure each plastic ear cup flange is clean.
2. Carefully work the SoftSeal Ear Cushions onto the ear cups by gently stretching the retaining flange over the plastic ear cup flange. Be sure the vinyl ear seal flange is placed evenly and smoothly around the perimeter of the plastic ear cup flange.
3. After installing SoftSeal Ear Cushions, adjust the headband to account for the larger volume of the SoftSeal Ear Cushions. This will relieve extra headband tension caused by the larger ear seals.

Installation Instructions For Headsets with Adhesive Type Ear Seals

1. Remove the ear seals by gently pulling them away from the headset's ear cup.
2. Use the enclosed adhesive adapters to attach the SoftSeal Ear Cushions to your headset. Peel off one side of the adapter's paper backing. Press the sticky side of the adapter onto the headset ear cup.
3. Remove the outside backing paper and carefully position the SoftSeal Ear Cushion, making sure it is straight and aligned correctly. Press the SoftSeal Ear Cushion securely onto the ear cup.
4. After installing SoftSeal Ear Cushions, adjust the headband to account for the larger volume of the SoftSeal Ear Cushions. This will relieve extra headband tension caused by the larger ear seals.

Care for your SoftSeal Ear Cushions

The soft, smooth, synthetic leather covers are easy to clean. Gently wipe clean with a sponge or soft cloth with a mild solution of soap and water.
