

Aerospace Products For Down to Earth Comfort®

## Oregon Aero® HushKit® Passive Ear Cup Noise Attenuation Kit

This kit was designed to be installed on most headsets without the need for special tools or disconnecting any wiring. In most cases a screwdriver and adjustable wrench are all you need. During installation, take care to avoid damaging the electronic components in the ear cup.

For the most clarity and noise reduction we recommend installing our complete headset upgrade kit.

### Installation Instructions

1. Remove one ear cup assembly from the headband by unscrewing the clamp nut or thumb screw. For simplicity, we will only be working on one ear cup at a time.
2. Remove the ear seal and all existing foam pieces surrounding the speaker from the ear cup. Remove the two screws that hold the speaker in place. These screws are hidden underneath the first layer of foam. Carefully work the speaker assembly out of the ear cup, leaving the wiring attached. **Leave the bottom layer of old polyfoam in the cup.**
3. Install solid foam layer (1) over the existing layer of polyfoam, in the ear cup. Use scissors to slit the foam to clear any obstructions.
4. Place the speaker on the foam layer. The speaker should “float within the foam” without being re-attached with screws. When placing the speaker, rotate it so the screw lugs will not come in contact with the screw towers. By doing this the speaker is no longer directly coupled to the ear cup and will be closer to your ear. The result is improved audio clarity as ambient noise picked up by the ear cup will no longer be transferred to the speaker.
5. Install the donut-shaped foam piece (2) around the speaker. This piece will adequately retain the speaker while allowing it to “float”. This piece of foam may appear too large; however, it compresses easily when worked into place around the speaker.
6. Install the cloth speaker cover (3) over the donut-shaped foam. Tuck the edges of the cloth under the ear cup flange.
7. Repeat steps 1-6 on the other ear cup.
8. Re-install both ear seals and re-attach the ear cups to the headband.

### Satisfaction Guarantee

If you are not satisfied with your Oregon Aero product for any reason, you have 30 calendar days to return the product from the date you purchased it for a full refund or exchange. To be eligible, product must be in good condition and include the receipt.

### Limited Warranty

This product is backed by a limited warranty against defects in manufacture for a period of two years from the date of purchase. In the event we receive the return of this product within the warranty period, and we agree that the product is defective, our sole obligation shall be to replace the product at no charge. We disclaim all other express or implied warranties, including any implied warranty of merchantability or fitness for a particular use. Some states do not permit the limitation of implied warranties, so this information may not apply to you.
