## Oregon Aero® ZetaLiner® Helmet Liner

The Oregon Aero ZetaLiner Helmet Liner is designed to replace the liner between your head and the styrene crush liner in your flight helmet. It carries perspiration away from your head keeping it cooler and drier. Liner molds to your head each time it is put on, preventing pressure points and creating a more stable fit.

### Installation Instructions

1. Remove the existing liner from the helmet.
2. Apply the self adhesive hook fastener strips to the styrene liner. See **Figure A**.
3. Grasp the ZetaLiner in the middle with the label side out and place it into the helmet with the front of the helmet liner toward the front of the helmet, starting at the top of the edge roll. See Photos.
4. Making sure it is centered in the helmet, press the liner to the hook fastener strips at the front. The front edge of the liner should cover the styrene liner but not cover the edge roll.
5. Press the ZetaLiner Helmet Liner into the center hook fastener strip and then do the same at the back of the helmet.

### Cleaning Instructions

Hand wash with a mild soap and rinse thoroughly. To dry, place the ZetaLiner® Helmet Liner flat on a large towel and fold the towel over to cover. Use a rolling pin or similar object to squeeze the excess water out; DO NOT WRING. Hang dry in a warm place or in front of a fan. It should dry overnight unless conditions are humid.
