# SoftSeat® Posture Cushion

**Portable Comfort  
– Anywhere**

# SoftSeat® Posture Cushion – Ultimate Comfort that’s designed to work with your existing seat.

SoftSeat® Posture Cushions are designed and made by hand in the U.S.A. by Oregon Aero—the same company that provides pain-free, safer seat cushion systems for every branch of the U.S. military.

SoftSeat® Posture Cushions can be used in your aircraft, car, airline seat, office or boat...anywhere you sit! Order Cushion Base/Lumbar Combo for Best Results and Best Value.

SoftSeat® Posture Cushions are 100% Satisfaction Guaranteed.

## Features & Benefits

The SoftSeat® Posture Cushion shifts your hips, pelvis and back into the proper, pain-free position, offering the following benefits:

- Helps minimize lower back pain from prolonged sitting
- Eliminates pain from “hot spots”
- Helps maintain blood circulation
- Equally effective for multiple users
- Has been used successfully in most types of seats
- Features zippered and interchangeable parts
- Options available to raise or move you forward
- Custom embroidery available
- Used successfully in fixed wing and rotor wing aircraft

## Order SoftSeat® Posture Cushion Base/Lumbar Combo for Best Results and Best Value

Selecting your SoftSeat® Posture Cushion is easy - just review the options listed below, make your choices and then call or order online.

### Ordering Options

#### Lumbar

##### • Lumbar Support

Our standard lumbar support. For Best Results and Best Value, select the SoftSeat® Posture Cushion Base/Lumbar Combo.

##### • Full Cushion Back

Need to be moved forward? Use the SoftSeat® Full Cushion Back with Adjustable Lumbar Support. Zippers to any SoftSeat® Posture Cushion Base. 21" high x 16 ¼" wide x 2" thick.

#### Thickness

- The ½" option is available for use in environments with limited headroom.
- The 1" option is our standard and **most popular option**.
- The 2" option is available for users who need to be raised in their seat.

#### Anchor

##### • Non-Skid Strips (most popular option)

More portable option — use carry handle and move easily to different seats. Two strips of black webbing with black non-skid rubber are hand sewn to the bottom of the Cushion.

##### • Straps

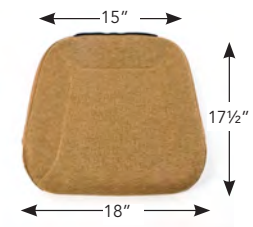

Best option if using Cushion Base for single purpose. Straps with adjustable buckle are sewn from side-to-side. Two hook-and-loop fasteners are sewn to the backs.

#### Cutout

##### • None (most popular option)

This option is to indicate no cutout at all. Recommended for use with SoftSeat® Lumbar Support for best results.

##### • Pilot

A specially designed cutout SoftSeat® Cushion Base accommodates aircraft controls and restraint systems. Used successfully in fixed wing and rotor wing aircraft. Can also be used for other seating (cars, boats, chairs, etc.). Use with SoftSeat® Lumbar Support for best results.
