### Oregon Aero® Zeta III™ Helmet Liner

The Oregon Aero Zeta III Helmet Liner is designed to replace the liner between your head and the styrene crush liner in your flight helmet. The Zeta III carries perspiration away from your head, keeping it cooler and drier. The liner molds to your head each time it is put on, preventing pressure points and creating a more stable fit.

#### Installation Instructions

1. Remove the existing liner from your helmet.
2. Grasp the liner in the middle with the label side out and place it into the helmet with the front of the Zeta III Helmet Liner toward the front of the helmet. See Photos.
3. Make sure the liner is centered in the helmet and press it to the hook-and-loop fastener strips at the front. The front edge of the liner should cover the styrene liner.
4. Press the Zeta III Helmet Liner into the helmet and then attach the liner to the hook fastener on the nape flap.

## Cleaning Instructions

Hand wash with a solution of mild soap and water. Rinse thoroughly. To dry, place the Zeta III flat on a large towel and fold the towel over to cover. Use a rolling pin or similar object to squeeze out the excess water. **DO NOT WRING.** Re-shape and air dry in a warm place or in front of a fan. **DO NOT USE ANY ARTIFICIAL HEAT SOURCE TO DRY.** Your Zeta III helmet liner should dry overnight unless conditions are particularly humid.

**WARNING:** Wringing the helmet liner or using an artificial heat source to dry will damage the product. Only use recommended methods of care.
